SUMMARY

Highly motivated Software developer who has half a year of experience in the field. Having a great work ethic, I'm able to connect the ones around me with my discipline and desire to learn. Collaborated on group projects with others and challenged those obstacles for a better performance to client expectations. Certificate in Full Stack Developer from the University of Miami Bootcamp where I develop knowledge in Front end: HTML5, CSS3 and frameworks such as Bootstrap, JavaScript. Back end: Node.js, MongoDB

SKILLS

Computer Science	Programming Languages	Communication & Interpersonal
Data Structures :	HTML5, CSS3, JavaScript,	Effective Communicator
Trees / Graphs / Computations	MySQL, MongoDB, Node.js	Decision-maker & Problem-solver
Algorithms / Searches / Sorts		

EXPERIENCE

Full Stack Developer Intern   *Miami,Florida* | June 2022
- Collaborated with 2-peers in one of the final projects to create a full MERN SPA Project that uses React for the Front end and meets acceptance criteria.
- Using documentation *"Google,Stack Overflow"* as the primary source for developers and console.log as the test tool for bug fixing.
- Expect a polished "*UI*" for a well rounded responsive app, and *"Chakra UI"* as the new style library.

Full Stack Developer Intern   *Miami,Florida* | Feb 2022
- Collaborated with 3-peers in my first project to create an interactive full Front end application
- The use of resources such as *"Google,Stack Overflow,MDN Web Docs"* for primary sources of information.
- Used two server-side APIs *" Food, Drink"* for its functionality.
- Expected the use of client-side storage to store persistent data.
